

プロジェクトメンバーの2017年度研究実績一覧

1. 雪田和人, 北條昌秀: 総論: 次世代の電気エネルギーシステム像電気学会誌, 138 巻 (2018) 2 号 p. 72-73, DOI <https://doi.org/10.1541/ieejjournal.138.72>
2. 雪田和人: 再生可能エネルギーによる発電技術の利活用状況, 電子情報通信学会誌掲載予定
3. 松村 年郎, 雪田 和人, 後藤 泰之, 塚本 真澄, 立脇 健人, 横水 康伸, 石井 佑弥, 石川 博之, 松尾 顕守, 岩月 秀樹, 飯岡 大輔, 大容量太陽光発電装置の高圧配電システム末端への導入に伴う配電システムの電圧上昇・低下メカニズムに関する回路論的考察, 138 巻 (2018) 1 号 p. 23-29, <https://doi.org/10.1541/ieejpes.138.23>
4. Vincent Obiozo Eze, Yoshikuki Seke, T. Mori, "Efficient planar perovskite solar cells using solution-processed amorphous WO_x/fullerene C60 as electron extraction layer", *Organic Electronics*, 46 (2017), pp.253-262
5. T. Mori, D. Sato, T. Egami, V. O. Eze, "Improvement of Photovoltaic Properties for Unmodified Fullerene C60-Based Polymer Solar Cells by Addition of Fusible Fullerene", *J. Photopolym. Sci. Technol.*, 30 (2017) pp.581-587.
6. Hiroto Nishihara, Hiroyuki Fujimoto, Hiroyuki Itoi, Keita Nomura, Hideki Tanaka, Minoru T. Miyahara, Patrick A. Bonnaud, Ryuji Miura, Ai Suzuki, Naoto Miyamoto, Nozomu Hatakeyama, Akira Miyamoto, Kazutaka Ikeda, Toshiya Otomo, and Takashi Kyotani, "Graphene-based ordered framework with a diverse range of carbon polygons formed in zeolite nanochannels", *Carbon*, Accepted. DOI: 10.1016/j.carbon.2017.12.055
7. Hiroto Nishihara, Katsumi Imai, Hiroyuki Itoi, Keita Nomura, Kazuyuki Takai, and Takashi Kyotani, "Formation mechanism of zeolite-templated carbons", *Tanso*, 280, 2017, pp. 169-174. DOI: 10.7209/tanso.2017.169
8. Hiroyuki Itoi, Hiroto Nishihara, Syunsuke Kobayashi, Somlak Ittisanronnachai, Takafumi Ishii, Raúl Berenguer, Masashi Ito, Daiju Matsumura, and Takashi Kyotani, "Fine Dispersion of Pt₄₋₅ Subnano-Clusters and Pt Single Atoms over Porous Carbon Supports and Their Structural Analyses with X-ray Absorption Spectroscopy", *J. Phys. Chem. C*, 121 (14), 2017, pp.7892-7902. DOI: 10.1021/acs.jpcc.7b00422.
9. Hiroyuki Itoi, Shinya Hayashi, Hidenori Matsufusa, and Yoshimi Ohzawa,

“Electrochemical Synthesis of Polyaniline in the Micropores of Activated Carbon for High-Performance Electrochemical Capacitors”, *Chem. Commun.*, 53 (22), 2017, pp. 3201-3204. DOI: 10.1039/C6CC08822H.

10. Hiroyuki Itoi, Yuka Yasue, Keita Suda, Seiya Katoh, Hideyuki Hasegawa, Shinya Hayashi, Masanao Mitsuoka, Hiroyuki Iwata, Yoshimi Ohzawa, “Solvent-free Preparation of Electrochemical Capacitor Electrodes Using Metal-free Redox Organic Compounds”, *ACS Sustainable Chem. Eng.*, 5 (1), 2017, pp. 556-562. DOI: 10.1021/acssuschemeng.6b01947.

11. Itoi, Hiroyuki; Yasue, Yuka; Suda, Keita; Katoh, Seiya; Hasegawa, Hideyuki; Hayashi, Shinya; Mitsuoka, Masanao; Iwata, Hiroyuki; Ohzawa, Yoshimi, "Solvent-free Preparation of Electrochemical Capacitor Electrodes Using Metal-free Redox Organic Compounds", *ACS Sustainable Chemistry & Engineering*, Vol.5, 556 - 562 (2017).

12. Hiroyuki Itoi, Shinya Hayashi, Hidenori Matsufusa, and Yoshimi Ohzawa, "Electrochemical Synthesis of Polyaniline in the Micropores of Activated Carbon for High-Performance Electrochemical Capacitors", *Chemical Communications*, 53, 3201 - 3204 (2017).

13. 糸井弘行, 西原洋知, 京谷 隆, "ゼオライト鑄型炭素上での水素のスピルオーバー～水素吸蔵材料を目指して～", *触媒*, 59, 263-267 (2017).
